

## SETUP to play TRANSMISSION THROUGH SOUND at Red Rocks

1. Download zip file: [PC](#) or [MAC](#) / If low on disk space, download without video here: [PC](#) or [MAC](#)
2. Unzip the file and move the extracted folder to the desktop or a preferred location
3. For PC, you are ready to open the Clone Hero application file (exe file)
4. For MAC:
  - a. Move the app file to the applications folder
  - b. Open the app and then close the app (this creates a folder)
  - c. Click somewhere on the desktop background so nothing is highlighted
  - d. Press command + shift + g and paste this exact text in the popup window:
    - i. ~/Library/Application Support/com.srylain.CloneHero
  - e. This takes you to the hidden Clone Hero folder on the Mac
  - f. Move the Transmission Through Sound folder into the songs folder shown there
5. Open Clone Hero application (For PC, it is recommended to view guide by phone when screen is in game)
6. Press spacebar to setup controls (keyboard has defaults, setup for Player One for example). How to use a Guitar Hero controller: [Compatible Controllers](#) / [Raphnet Adaptor](#) if applicable
7. Return to Home Screen. Press start to login to a new profile or "Guest"
8. Go to SETTINGS, GENERAL, click SCAN SONGS (Green button for enter, strum to scroll)
9. Go to SETTINGS, GAMEPLAY, check SONG VIDEOS (Green button to select SONG VIDEOS, strum down to check the box). Return to Home Screen by going back with the Red button.

**YOU ARE NOW READY TO PLAY, just find the song in the library in Quickplay! Good luck!**
